Math Review: Volume 3 By Carol Ann Goldstein

Introduction

Math Review is primarily about fractions and decimals, with some content for times tables, squares and square roots. The book is suited for any age from elementary school to and including adults. I have tutored students of all ages and find that the most troubling materials are fractions and decimals. What makes my book unique is that it contains a detailed explanation of how to solve each question in one or two ways. It contains 1500 questions.

If you want a review of fractions(add, subtract, multiply and divide), decimals(add, subtract, multiply and divide), squares, square roots and times tables, then the Math Review is for you. Each question has a customized, detailed, step by step explanation of how to solve it in understandable terms. This is perfect for students of all ages.

Fractions, decimals, squares, square roots, times tables are skills which are key to success in math classes and in life.

For educators, parents and students of all ages.

The Math Review contains the following:
