Introduction

EASY Timed Math Drills — MULTIPLICATION was developed especially for students who are having difficulty with basic math concepts. Students will gain confidence, speed, and accuracy as they progress through these step-by-step exercises. The drills start with whole page single factor calculations and progress to calculations with two different factors, then 3 different factors, and finally to all-inclusive mixed factor drills. Pages with turnaround calculations and skip counting worksheets offer extra help and practice.

Set an appropriate time limit for each drill based on your student's ability levels. The amount of time allocated can be adjusted as skill levels develop. A chart is included on which each student's progress can be recorded. To validate a student's achievement, we have also included an award certificate.
